

both) during the base period then quota may be fixed by taking the appropriate calculation of deemed demand.

If the consumer is getting third party sale through short term open access then the same may be allowed over and above the TNEB quota by calculating the deemed demand applicable accordingly.

The number of actual beneficiaries of banked Wind Energy Generators through wheeling has to be given by CE/NCES.

In the above method the consumer may use their banked wind energy as on 31.10.2008 and CPP supplied energy without any cut.

Further an undertaking has to be obtained from the consumer by concerned SEs /EDC agreeing to pay the excess demand and energy charges if they utilized the TNEB supply over and above the TNEB portion quota.

The excess demand charges will arise when the consumer draws excess demand and energy from TNEB grid after adjusting the CPP and 1/ 5 portion of banked energy every month

The billing procedure for calculating the above banked wind energy and the method of refund or collection of amount are to be evolved by Accounts Branch
