

may be revised for the above HT consumer by following the existing procedure available .

The available banked wind energy power as on 31.10.2008 for each and every HT consumer has to be divided in to five monthly equal installments and for each and every installment of banked wind energy the deemed demand (Annexure Table - II ) has to be calculated as per the TNERC formula for the wind energy and the same has to be permitted over and above the TNEB Power supplied quota as like CPP power

To implement the above the existing quota fixed for those having banked wind energy has to be re fixed as detailed below:-

Already two instructions vide reference No.(2) and (3) have been issued regarding fixing of quota for CPP energy consumers. For those are having banked wind energy the already fixed quota was by including the wind energy and TNEB supplied energy. Now to permit the banked wind energy available as on 31.10.2008 over and above the TNEB quota the already fixed quota has to be refixed by taking only the TNEB supplied energy and demand for that in continuation of the above the following procedure has to be followed to fix quota for the banked wind mill energy users.

**I(a)Fixing of Energy Quota those whoare using wind and CPP power :-**

- (i) Monthly base energy consumption as illustrated }  
in working instructions dated 1.11.2008 } A
- (ii) In that the actual energy supplied (monthly average) } B<sub>CPP</sub>  
for the above three months average by the CPP }
- (iii) In that the actual energy supplied (monthly average ) }
